Palliative Care App — Product Requirements Document (Updated)

Version: v1.1 • Updated on: August 21, 2025

This PRD consolidates the latest wireframe updates and expands the scope to include Volunteer History, Nurse Case History, Super Admin workflows, and center management.

Changelog

- Added Volunteer/Nurse Case History tabs and Volunteer History Update screen.
- Introduced Related Person addition within cases.
- Expanded Super Admin module: Dashboard, Add/Edit Center & Admin, Profile, and Data-only Center Details.
- Defined Notifications screen structure and Login screen details.

1. Objective

Provide a structured, role-based platform to capture, review, and manage palliative care cases across centers. The system streamlines data entry by volunteers and nurses, centralizes case history, and gives administrators oversight and configuration tools.

2. Users & Roles

• Volunteer — records patient, family, financial, environment details, and submits visit updates; adds related persons; updates case history.

• Nurse — records medical and care-related case history and notes; reviews volunteer updates.

• Admin (Center Head) — manages patients, volunteers, and center data.

• Super Admin — manages centers and assigned Admins; edits center details; views data lists; profile management.

• Patient/Family (indirect) — their information is collected and managed within cases.

3. Information Architecture / Screen Inventory

Screens included in scope:

1 Login

2 Notifications

3 Volunteer (Registration & Case data capture)

4 Volunteer & Nurse Case History (tabbed)

5 Volunteer History Update

6 Super Admin Dashboard

7 Add Center & Admin

8 Edit Center & Admin

9 Super Admin Profile

10 Center Details (Data Only)

11 Center Users (navigated from Center Details)

4. Functional Requirements by Module

4.1 Authentication – Login

• Email and Password fields; Login button; basic validation and error messages.

• Successful login routes user to their role-appropriate home/dashboard.

4.2 Notifications

• List of notifications as rectangular cards: icon (left), sender name, message, and timestamp.

• Sorted by most recent; tapping opens linked record when available.

4.3 Volunteer Module

Data Capture Sections: Registration, Address, Student/Family Details, Employment/Income, Welfare Benefits, Environment/Support, Case Progress, Volunteer Observations, Volunteer Plan, Volunteer Data, Additional Support (photos/documents).

Key Additions:

- History Navigation — direct link to the combined history page.
- Related Person in Case — add person’s Name and Phone; show within case details.

4.4 Case History (Volunteer & Nurse)

• Single page with two tabs: Volunteer History and Nurse Case History.

• Each history record appears as a full-data card; chronological ordering; edit controls for authorized users.

• Search/filter (optional v2): by date range, contributor, or tag.

4.5 Volunteer History Update

• New Suggestion text field for new remarks, recommendations, or updates.

• Update action adds an entry to case history (linked to Volunteer History tab).

4.6 Super Admin Module

Dashboard features: list/grid of centers with center image, center info (name, address, contact/email), admin info (name, contact, email), and actions (edit/delete). Includes search bar, FAB to Add Center & Admin, and profile icon.

Add Center & Admin: center details (name, address, phone, email, image) and admin details (name, phone, email, password).

Edit Center & Admin: same fields as Add, prefilled and editable; update password option.

Super Admin Profile: profile image, name, role, contact, email, address, and logout.

Center Details (Data Only): scrollable list of text entries (notes/reports) without titles or author metadata; FAB navigates to Center Users.

5. Data Model (Conceptual)

Core entities and key fields (IDs are unique and immutable):

Entity	Key Fields (not exhaustive)
User	id, role [VOLUNTEER|NURSE|ADMIN|SUPER_ADMIN], fullName, phone, email, centerId
Center	id, name, address, phone, email, imageUrl, adminUserId
Case	id, patientId, centerId, registrationData, address, familyDetails, employmentIncome, welfareBenefits
RelatedPerson	id, caseId, name, phone, relation (optional)
HistoryEntry	id, caseId, type [VOLUNTEER|NURSE], authorUserId, createdAt, textContent, attachments[]
Notification	id, recipientUserId, iconType, senderName, message, timestamp

6. Permissions & Access Control

• Volunteers: create and edit their own case entries, add related persons, update volunteer history.

• Nurses: create and edit nurse case history entries.

• Admins: manage cases and users within their center.

• Super Admins: manage centers and Admins; view data-only lists; cannot edit volunteer/nurse entries unless explicitly granted.

• All actions audited with author and timestamp.

7. Non-Functional Requirements

Performance: median screen load under 2 seconds on 4G.

Security: role-based access, secure auth, encrypted credentials/storage for PII/PHI as applicable.

Scalability: supports hundreds of centers and thousands of cases.

Usability: simple forms; clear navigation between data capture and history.

Compliance: respect patient confidentiality and local data protection regulations.

8. Success Metrics

• Weekly number of history entries (volunteer and nurse).

• Volunteer/Nurse active usage (logins, submissions).

• Time from case creation to first history update.

• Number of centers onboarded and managed.

9. Open Questions / Future Enhancements

• Role-based export of case histories (PDF/CSV).

• Offline-first data capture and deferred sync.

• Filters/search on history lists.

• Tagging/labeling of history entries; attachments in Nurse updates.
