

Screen / Page

Login Screen — A single page where the user can enter their credentials to access the app.

Screen Name

LoginScreen

Component List with Purpose

Username TextField – Allows the user to enter their username or email.

Password TextField – Allows the user to enter their password (hidden input).

Login Button – Submits the entered credentials to authenticate the user.

Screen / Page

Super Admin Screen

A single page for the super admin to manage centers and admins in the app.

Screen Name

SuperAdminScreen

The internal name used in the code for this screen.

Component List with Purpose

Search Bar (Top) – Allows the super admin to search for specific centers or admins.

Profile Icon (Left Side) – Navigates to the super admin's profile screen.

Center/Admin Card (Tapable) – Displays information about a center and its admin(s).

Tapable – Tapping the card navigates to the Center Details Screen.

Center Image – Shows the image of the center.

Delete Icon – Deletes the corresponding center or admin.

Edit Icon – Navigates to the edit screen for that center or admin.

Floating Plus Button – Navigates to the "Create Center/Admin" screen to add new entries.

Screen / Page

Super Admin Profile Screen

A page where the super admin can view their profile details including image, name, email, number, role, location, and logout.

Screen Name

SuperAdminProfileScreen

The internal name used in the code for this screen.

Component List with Purpose

Profile Image – Displays the super admin's profile picture.

Name Field (Text) – Shows the super admin's full name.

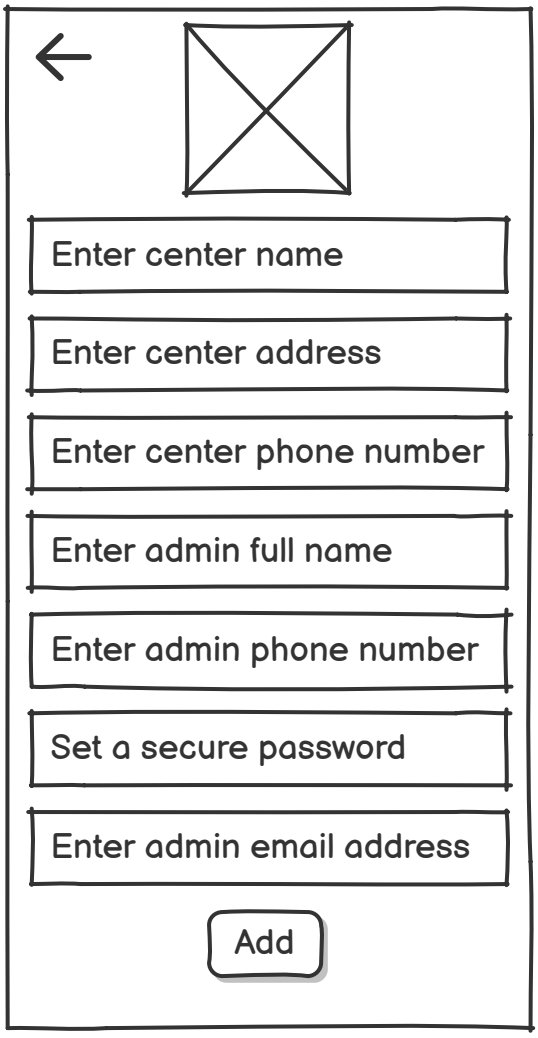

Email Field (Text) – Shows the super admin's email address.

Phone Number Field (Text) – Shows the super admin's contact number.

Role Field (Text) – Shows the user role (e.g., Super Admin).

Location Field (Text) – Shows the super admin's current location.

Logout Button – Logs the super admin out of the app.

Screen / Page

Add Center and Admin Screen

A page for the super admin to create a new center along with its admin details and upload the center image.

Screen Name

AddCenterAdminScreen

The internal name used in the code for this screen.

Component List with Purpose

Center Image Upload Button (Top) – Allows the super admin to select or upload an image for the center.

Center Name Field – Input field to enter the name of the center.

Center Address Field – Input field to enter the address of the center.

Center Phone Field – Input field to enter the contact number of the center.

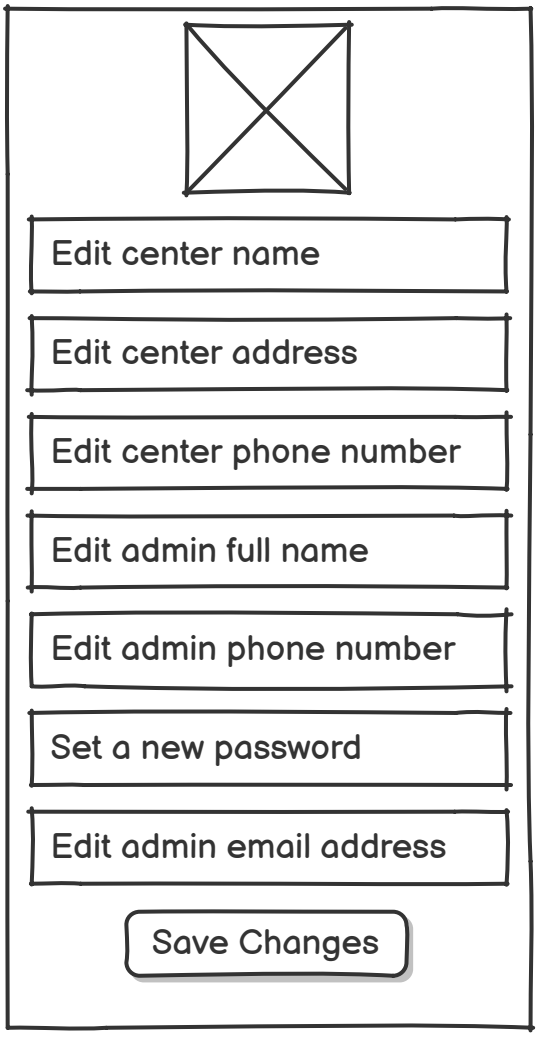

Admin Name Field – Input field to enter the admin's name.

Admin Phone Field – Input field to enter the admin's phone number.

Admin Email Field – Input field to enter the admin's email (for login purposes).

Admin Password Field – Input field to set the admin's password.

Add Button – Submits all the entered information and uploads it to Firebase.

Screen / Page

Edit Center and Admin Screen

A page for the super admin to update an existing center's information and its admin details.

Screen Name

EditCenterAdminScreen

The internal name used in the code for this screen.

Component List with Purpose

Center Image Upload/Change Button (Top) – Allows the super admin to update or change the center image.

Center Name Field (Enter New Name) – Input field to update the name of the center.

Center Address Field (Enter New Address) – Input field to update the address of the center.

Center Phone Field (Enter New Phone) – Input field to update the center's contact number.

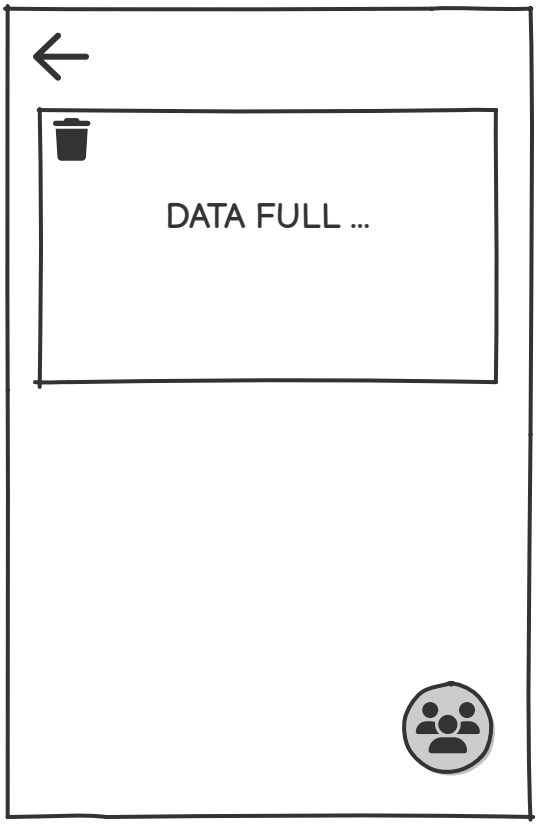

Admin Name Field (Enter New Name) – Input field to update the admin's name.

Admin Phone Field (Enter New Phone) – Input field to update the admin's phone number.

Admin Email Field (Enter New Email) – Input field to update the admin's email.

Admin Password Field (Enter New Password) – Input field to update the admin's password.

Save Changes Button – Submits all updated information and saves changes to Firebase.

Screen / Page

Center Details Screen

A page that opens when a center is tapped, showing full details about the center, its nurses, volunteers, and their submitted data.

Screen Name

CenterDetailsScreen

The internal name used in the code for this screen.

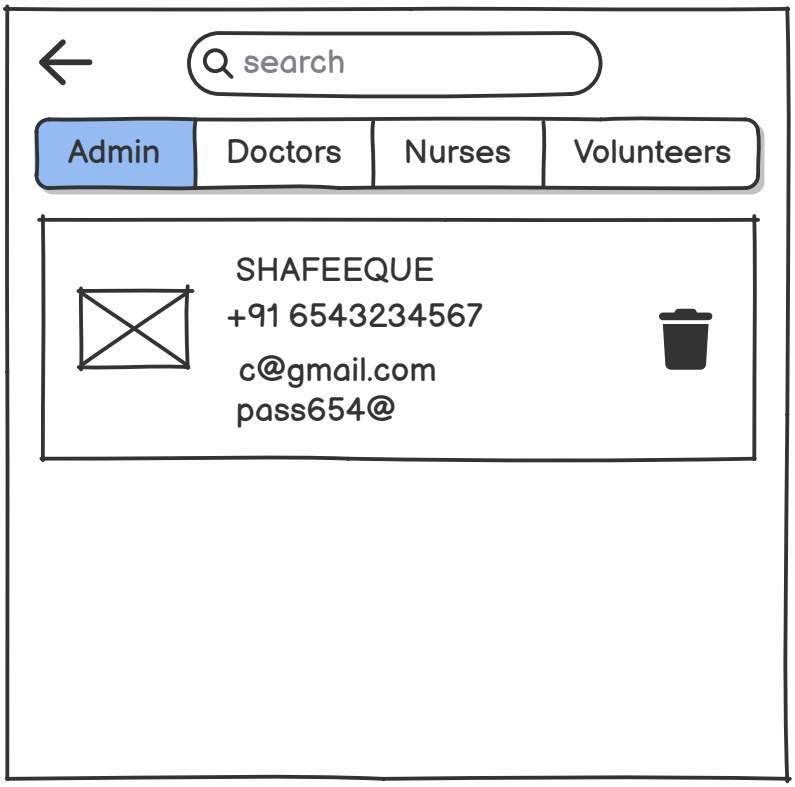

Component List with Purpose

Center Details Card – Displays detailed information about the center.

Nurse/Volunteer Entries – Shows full data submitted by nurses and volunteers.

Delete Icon (Left Side of Each Entry) – Deletes the specific nurse/volunteer entry.

Floating Button – Navigates to a screen showing full profiles of all people associated with this center.

Screen / Page

Center Users Screen

A page to display all users (doctors, patients, volunteers, admins) of a center, with search and tabs for easy navigation.

Screen Name

CenterUsersScreen

The internal name used in the code for this screen.

Component List with Purpose

Search Field (Top) – Allows searching for a specific user across all tabs.

Tabs (Doctor, Patient, Volunteer, Admin) – Organizes users into categories for easy navigation.

User Card (Inside Each Tab) – Displays information about each user.

User Image – Shows the user's profile picture.

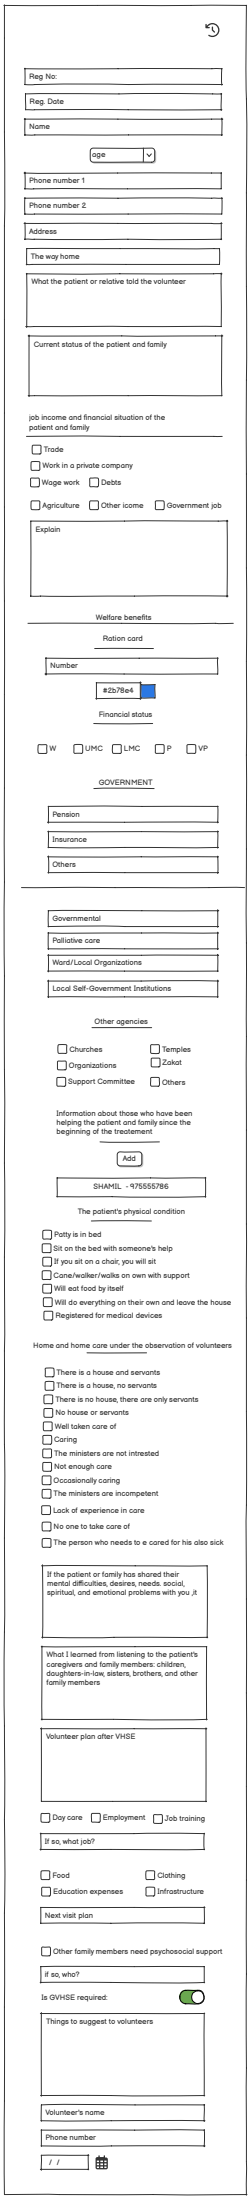

Name – Shows the user's full name.

Email – Shows the user's email address.

Phone – Shows the user's phone number.

Set Password (Text) – Shows the user's password or a placeholder for security.

Delete Icon (Right Side) – Deletes the corresponding user from the center.

Screen Name

VolunteerScreen

The internal name used in the code for this screen.

Component List with Purpose

History Icon – Navigates to the Volunteer History Screen.

Reg No Field – Input field to enter the patient/volunteer registration number.

Reg Date Field – Input field or date picker to capture the date of registration.

Name Field – Input field to enter the patient's name.

Age Dropdown – Dropdown to select the patient's age.

Phone Number 1 & 2 Fields – Fields to record patient contact numbers.

Address Field – Input field to capture the patient's address.

The Way Home Field – Field for directions/notes on reaching the home.

Patient/Relative Statement Field – Text area to capture what the patient or relative told the volunteer.

Current Status Field – Text area to record the current condition of the patient and family.

Job/Income Checkboxes – Options to record employment and financial details (Trade, Private job, Wage, Agriculture, Govt job, Other income).

Income Explanation Field – Text area to provide more explanation about income.

Ration Card Field – Input field to capture ration card number.

Financial Status Checkboxes – Options to categorize financial level (W, UMC, LMC, LP, VP).

Government Scheme Fields – Input fields for Pension, Insurance, and Others.

Support Agencies Fields – Input fields to record support from Palliative care, Local organizations, or Govt institutions.

Other Agencies Checkboxes – Options for support from Churches, Temples, Zakat, Support Committee, or Others.

Add Helper Button – Button to navigate to a separate Helper Entry Screen.

Helper Info Card (after adding helpers) – Displays the list of helpers (Name, Phone, Relationship, Help Provided) who are supporting the patient since treatment began.

Physical Condition Checkboxes – Options to record the patient's condition (Bedridden, Needs support, Can eat on own, Registered for devices, etc.).

Home & Care Observation Checkboxes – Volunteer observations about the home situation and caregiving support.

Family Difficulties Field – Text area to record difficulties shared by the family.

Volunteer Learning Field – Text area to capture insights gained from conversations with patient/family.

Volunteer Plan after VHSE Checkboxes – Options for future plans (Day care, Employment, Job training).

Job Detail Field – Input field to specify job details if Employment is selected.

Support Needed Checkboxes – Options to request Food, Clothing, Education, or Infrastructure.

Next Visit Plan Field – Text area to describe the next planned visit.

Psychosocial Support Field – Checkbox and input field for noting family members needing support.

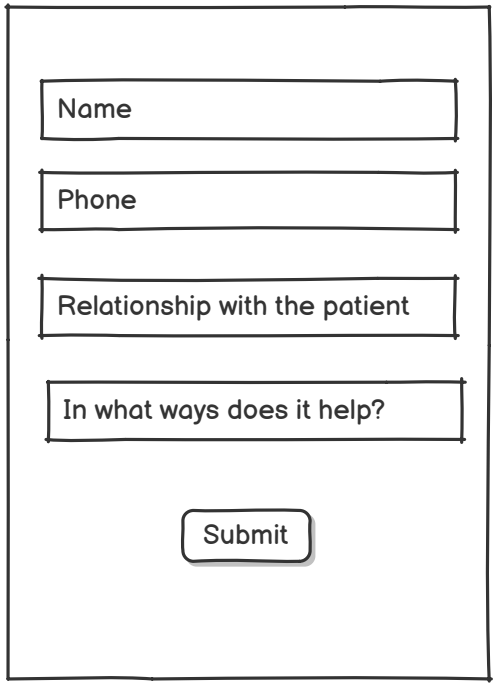

GVHSE Required Toggle – Switch to mark whether GVHSE support is required.

Volunteer Suggestions Field – Text area for suggestions to other volunteers.

Volunteer's Name Field – Input field to capture the volunteer's name.

Volunteer Phone Field – Input field to record volunteer's phone number.

Calendar Icon – Date picker to schedule the next visit.

Screen / Page

Add Patient Helper Screen

A page for adding information about people who have been helping the patient and family since the beginning of the treatment.

Screen Name

AddPatientHelperScreen

The internal name used in the code for this screen.

Component List with Purpose

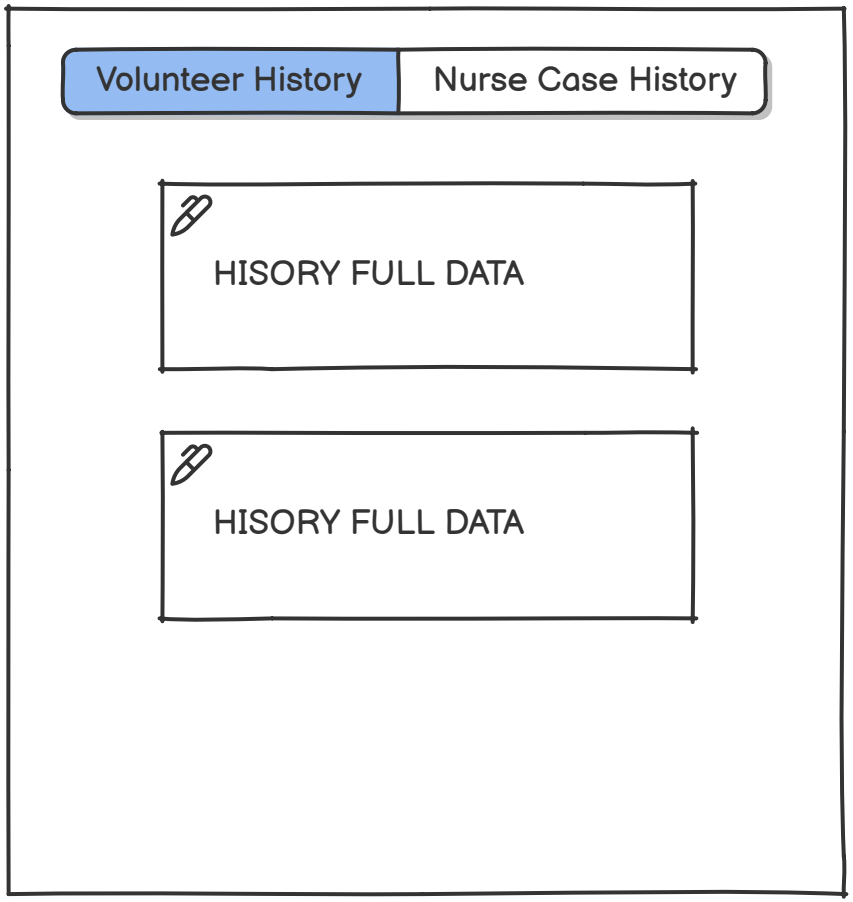

Name Field – Input field to enter the helper's name.

Phone Field – Input field to capture the helper's contact number.

Relationship Field – Input field to specify the helper's relationship with the patient.

Help Details Field – Text area to describe in what ways the helper supports the patient and family.

Submit Button – Saves the helper details and navigates back to the Volunteer Screen where it appears as a Helper Info Card.

Screen / Page

Volunteer History Screen

A page where volunteers can see the history of the data they have submitted, organized in tabs.

Screen Name

VolunteerHistoryScreen

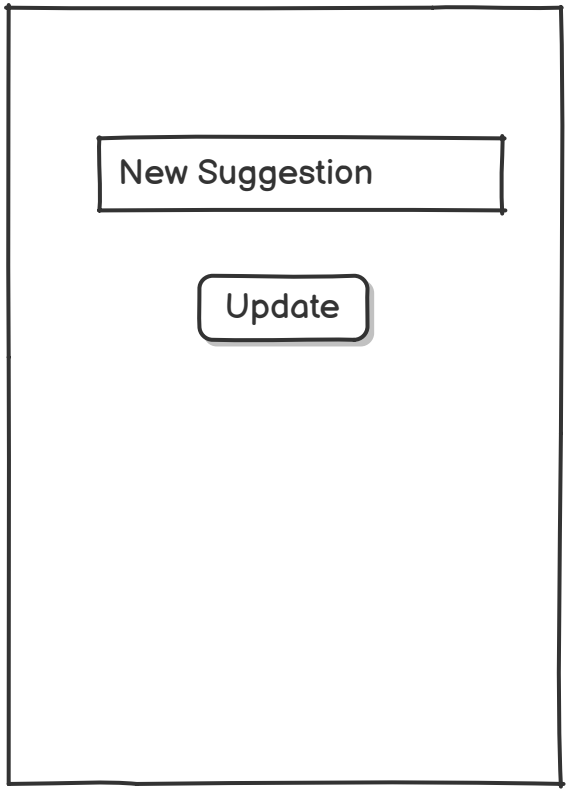

The internal name used in the code for this screen.

Component List with Purpose

Tabs (Nurse Case History, Volunteer History) – Organizes the history data into two categories for easy navigation.

History Card (Inside Each Tab) – Displays each submitted data entry as text.

Edit Icon (Left Side) – Allows the volunteer to edit the specific entry.

Screen / Page

Volunteer Data Updating Screen

A page where a volunteer can update their own data or provide new suggestions.

Screen Name

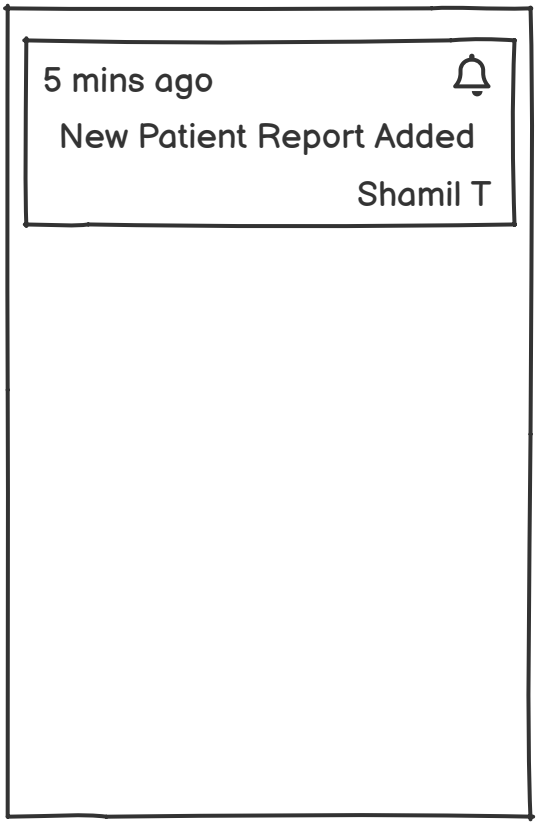

VolunteerUpdateScreen

The internal name used in the code for this screen.

Component List with Purpose

New Suggestion Field – Input field where the volunteer can type new suggestions or updates.

Update Button – Submits the entered suggestion and updates the data in Firebase.

Screen / Page

Notification Screen

A page where the user can see all notifications, including messages, time, and the user who triggered the notification.

Screen Name

NotificationScreen

The internal name used in the code for this screen.

Component List with Purpose

Notification Card – Displays a single notification entry.

Message Text – Shows the notification message content.

Time – Shows the time when the notification was created.

Bell Icon (Right Side) – Visual indicator for the notification.

User Name (Bottom) – Shows the name of the user who triggered the notification.
